<https://franciscocarvajal404.github.io/Portafolio-Francisco-Carvajal/>

My goal is to specialize in front end development; currently Jr developer, with the goal of being Senior in 5 years.

Always studying and improving my skills not only as a designer, but also as a developer and programmer.

I adapt very well to different environments; I apply the technologies that I know, and I learn the ones that I don't if they are required.

Enthusiast of video games, gadgets, musical instruments and hardware.

EXPERIENCE

2021

FRONT END DEVELOPMENT FREELANCE

- Development of full responsive pages with HTML, CSS and JS
- Creation of page from design or elaboration of one
- Construction of sites from 0

EDUCATION

MAYO 2020

HIGH SCHOOL WITH ENGINEERING AREA, PREPARATORIA 2 DE OCTUBRE DE 1968 BUAP

High school level studies with an area in engineering (focus on mathematics, calculus, algebra and physics).

JUNIO 2023

ORACLE NEXT EDUCATION, ALURA LATAM AND ORACLE

Comprehensive training for web development and programming. Front end specialization.

SKILLS

- HTML
- CSS
- Flexbox
- Effective and assertive communication
- Customer Support
- Time management

- BEM
- Responsive design
- JavaScript
- React with Vite
- React router
- Styled components
- Material UI with React
- API consumption
- Git and Github
- Figma
- Photoshop and Illustrator
- DaVinci Resolve
- PHP and MySQL (basic)
- Analytical thinking
- Team and individual work
- Flexibility
- Autodidact
- Organized
- Responsible

ACTIVIDADES

- **Degree in Physics, BUAP (2020-2022)**

During the four semesters I studied, I learned mathematics from its most elementary part, linear algebra and algebraic methods, differential and integral calculus, vector spaces, geometry, classical mechanics, experimental theory and intermediate concepts of electromagnetism and differential equations.

- **Languages**

I love languages, the more languages you know how to speak, the more people you can have a conversation with, but what I like the most is that you can communicate your ideas better, since you have more resources to express them. At the moment, I speak Spanish natively, I have advanced English in writing and reading (certification in process) and basic Japanese, perhaps comparable to an A2 level.

- **Healthy lifestyle**

I care a lot about my physical and mental well-being, which is why I am a strong fan of exercise and meditation. I like to be in motion and not feel stagnant. Among my favorite activities are: gym, jogging alone or with my dog, cycling, outdoor walks, and sports like swimming and skating. For mental health I implement routines and habits in my daily life, such as small rituals before going to sleep or waking up early and making the bed, getting ready and going to the gym. Mindfulness helps me to be in the present moment and have gratitude towards my loved ones, the opportunities that have been presented to me, the privileges that I have and have had, and the life that I am living every day.

- **Self-taught person**

Learning is not just a skill, it is also a lifestyle. Learning new things daily gives us a feeling of happiness and improvement, as well as giving us knowledge and skills to face old and new problems. In the world of technology, learning is essential, since everything is always being updated, therefore, I study every day about design, work methodologies, code standards, and looking for and learning technologies that position me as a good choice in the job market.

- **Certificates**

All my certificates are in my LinkedIn profile, hardskills certificates like HTML, CSS, Git, JS, React, etc.; and softskills such as entrepreneurship, agile methods, time management, etc.
